BACK-END SKILL

- ASP.NET
- REST API
- DATABASE – SQL
- OOP
- Problem Solving
- Debugging
- Data structures, Algorithms
- Version Control (GitHub)
- EntityFramework
- C#, Java, C++

FRONT-END SKILL

- HTML, CSS, JAVASCRIPT
- Angular
- Typescript
- jQuery
- Bootstrap

EDUCATION

- **The Hashemite University**, software engineer 2019-2023

PROJECTS

- **Shopx** is a university graduation project, developed using ASP.NET REST APIs, Angular, and a SQL Server database. It has different users like admin, seller, and customer. The admin manages everything, customers can browse, add items to their cart, and buy them, while sellers can add and manage their products. There are also many other cool features in the project.
  https://github.com/Ayham-Alhittini/Shopx

- **Social media** site developed using ASP.NET REST APIs with Angular and SQL Server. The project implements authentication and authorization mechanisms on both the client and server sides. The site offers various features, such as adding friends, suggesting friends, uploading photos to the cloud, real-time messaging system, profile editing, and a like button.
  https://github.com/Ayham-Alhittini/Social-Media

- **SpeedyFingers**: calculate WPM(word per minute) and have competitions and multiplayer
